Cloning Makes Strange Bedfellows

The anti-cloning stance taken by some liberals motivated by a fear that in the absence of a ban on cloning, cloning ban advocates might seek to prevent cloning by infringing on certain civil liberties, is an example of the far-reaching implications of the cloning debate. An overview of some of the likely consequences effects of establishment or rejection of a ban on cloning.

Cloning's High Cost

Responding to sensational reports of the first successful cloning of humans and the potential future applications of cloning, this sobering article articulates the financial, logistical, and political challenges to therapeutic cloning.

Conceiving a clone

The science, moral, and ethical questions of cloning, plus molecular biology and genetics information.

England OKs Stem Cell Cloning

Citing the numerous potential medical benefits, Britain's House of Lords has decided to allow the limited cloning of embryos. Overview of responses to the decision.

Fat Mice and Copy Cats

The finding that some cloned mice develop obesity is a prime example of the feared complications of cloning. This

News item from BBC News.

[Human Cloning Controversy](#)
News of plans to clone human beings have stirred up a heated debate over the safety and ethics of the technique.

[Human Cloning Foundation](#)
Information, essays, and articles on human cloning.

[Law and Nature Collide](#)
While patents are necessary to protect biotechnology inventions, clones represent a unique challenge because they are not novel - they are replicas of existing animals. An overview of methods to retain rights to applications of clones.

[Should Human Cloning Be Banned?](#)
Uniquely designed page featuring an on-line debate on human cloning.

[Study Raises Human Cloning Doubts](#)
The assumption that cloning is an easy way to generate identical copies of an animal is challenged by the finding that many clones develop abnormally. An overview of a report challenging the effectiveness of cloning.
